Re: V

In response to the written opinion, the claims have been amended to include a specific group of viscosity-increasing compound. The application provides basis for such amendment, and it renders the claims novel in accordance with Art.33(2) PCT.

The application further shows an unexpected effect in that the treated oil installations require less frequent treatment than was previously necessary in the art. An inventive step in accordance with Art.33(3) PCT can therefore be acknowledged.

Industrial applicability has never been contested, and goes without saying.

The applicant has filed deposit receipts for the claimed bacterial strains to verify compliance with the disclosure requirements under the Budapest treaty.
